

BUG REPELLENT PLANT SOLUTIONS

Repel unwanted pests from your yard with plants.

Mint: Menthol, an oil produced from mint plants, helps to repel mosquitoes.

Lemon Balm: Citronella (like the candle) is an oil found in lemon balm that helps keep the mosquitoes and gnats away in the summer heat.

Thyme: No-see-ums and mosquitoes hate the smell of thyme.

Rosemary: A perfect pick for your garden, rosemary can repel a variety of insects that are harmful to vegetable plants.

Lavender: Not only does it smell wonderful, but it also keeps away moths, fleas, flies and mosquitoes.
